AURITRO DEY KIRTY

Ghaziabad, India, 201005 | +91 8448591615 | deykirtyauritro@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

SUMMARY

Computer Science Undergraduate and a **Full-Stack Developer** with strong foundations in **Data Structures & Algorithms (469+ problems solved)** and modern web technologies including **React**, **Node.js**, and **Express**. Experienced building real-time, API-driven, and AI-integrated applications with authentication, **role-based access control**, and **database modelling** through deployment. Seeking a Software Development Engineer or Full-Stack internship to build scalable, production-ready systems.

EDUCATION

Guru Gobind Singh Indraprastha University — **Delhi, India**
B.Tech in Computer Science & Engineering; CGPA: 8.255/10 (4th Semester SGPA: 8.500) — *July 2024 – Present*

TECHNICAL SKILLS

Languages: JavaScript (ES6+), SQL, C++, C, Python
Frontend: React.js, React Router, Tailwind CSS, ShadCN UI, React Hook Form, Zod, Zustand, Leaflet.js
Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Socket.IO
Databases: MongoDB, Mongoose ODM, Firebase (Auth, Firestore)
AI Integration: Google Gemini API, Hugging Face
Tools & Platforms: Git, GitHub, Vercel, Postman, Axios, OAuth
Core Concepts: Data Structures & Algorithms, OOP, MVC Pattern, Operating Systems, DBMS, Computer Networks

PROJECT EXPERIENCE

Live Web Tracker Platform — **June 2026**
JavaScript, Firebase Auth, Firestore, Leaflet.js, Geolocation API
Repository: shorturl.at/n6u9C | Live Demo: rb.gy/bq7f5u

- Built a real-time, room-based location-sharing app supporting concurrent users across private, isolated sessions.
- Implemented Google OAuth via Firebase Auth and synced live user coordinates across clients using Firestore listeners with automatic marker cleanup on disconnect.
- Integrated the Geoapify API for reverse geocoding of live coordinates into human-readable addresses.

MeshCompute AI – Distributed Computing Platform — **November 2026**
Node.js, Express, Socket.IO, MongoDB, React, Gemini API
Repository: shorturl.at/eO4ZR

- Co-built a distributed computing platform: a coordinator splits jobs into tasks, schedules them across worker agents by free capacity and CPU load, and aggregates results; workers run tasks in Node.js worker threads.
- Engineered fault tolerance with heartbeat-based failure detection, task retries and reassignment, and worker identity checks.
- Added Gemini API natural-language job compilation (Zod-validated, rule-based fallback) and a real-time React dashboard.

Full-Stack Food Ordering & Operations Platform — **June 2026**
Domino's-Inspired | MongoDB, Express.js, React.js, Node.js, JWT
Repository: shorturl.at/x27W8 | Live Demo: rebrand.ly/qlbbbrp

- Collaborative Development: Implemented JWT-based authentication and RBAC middleware in a cross-functional team to protect administrative routes and role-specific APIs for a full-stack MERN platform simulating restaurant operations and e-commerce workflows.
- REST APIs & Database Modelling: Built Express.js and MongoDB REST APIs for authentication, user management and order workflows, and integrated them with the React frontend for real-time data interaction.
- Code Collaboration: Used Git/GitHub feature branches and resolved merge conflicts to maintain a clean, scalable codebase.

Pokémon Battle Simulator & Stat Analyser — **October 2025**
JavaScript, PokeAPI, Gemini API, CSS3
Repository: shorturl.at/POxYf | Live Demo: shorturl.at/vcgup

- Built a turn-based battle simulator with dynamic HP tracking, type-matchup logic, and Gemini API-driven stat analysis for strategic decision-making.
- Optimized DOM updates for real-time battle-state transitions and custom CSS animations.

ACHIEVEMENTS & CERTIFICATIONS

- Top 10 out of 130 teams at hackCBS 9.0 (SSCBS, University of Delhi; 24-hour national hackathon, Nov 2026) – built MeshCompute AI.
- Solved 469+ Data Structures & Algorithms problems across multiple platforms (LeetCode: 333+ problems, 1529 Contest Rating).
- Full Stack Development with AI certification course (45 Days) – Brain Mentors, New Delhi, July–August 2026.
- HackerRank SQL (Intermediate) Certificate – June 2024.
- freeCodeCamp Responsive Web Design Certificate – April 2026.
