

AURITRO DEY KIRTY

Ghaziabad, India, 201005 | +91 8448591615 | deykirtyauritro@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

SUMMARY

Computer Science undergraduate with strong foundations in Data Structures & Algorithms (200+ LeetCode problems, 1446 contest rating) and full-stack web development. Experienced in building real-time web applications using React, Node.js, Firebase, and REST APIs. Passionate about scalable backend systems and seeking Software Development or Full-Stack Development internship opportunities.

EDUCATION

Guru Gobind Singh Indraprastha University

B.Tech in Computer Science & Engineering; CGPA: 8.255/10 (4th Semester SGPA: 8.500)

Delhi, India

July 2024 – Present

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Web Development, Database Management Systems

Mayo International School

Senior Secondary (Class XII – Science); Grade: 84%

Delhi, India

Apr 2023 – May 2024

TECHNICAL SKILLS

Languages: JavaScript (ES6+), SQL, C++, C, Java, Python

Frontend: HTML5, CSS3, React, Tailwind CSS, shadcn/ui, Leaflet.js

Backend: Node, Express, REST APIs

Databases: MongoDB, Firebase Firestore

Authentication: Firebase Auth, JWT, OAuth 2.0

Tools & Platforms: Git, GitHub, Postman, Vercel, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

PROJECT EXPERIENCE

Live Web Tracker Platform

JavaScript, Firebase Auth, Firestore, Leaflet.js, Geolocation API

[GitHub](#) | [Live Demo](#)

- Built a real-time, room-based location-sharing web application supporting concurrent users across private, isolated sessions with live distance tracking, speed monitoring, and an SOS emergency alert feature.
- Implemented secure Google OAuth authentication and managed persistent user sessions via Firebase Auth.
- Integrated Leaflet.js with OpenStreetMap and the browser Geolocation API to plot and continuously update live user coordinates on an interactive map.
- Designed real-time synchronization using Firebase Firestore listeners, enabling instant location updates across multiple connected clients with automatic cleanup on disconnect.
- Utilized the Geoapify API for reverse geocoding, converting raw coordinates into human-readable addresses on the live dashboard.

Pokémon Battle Simulator & Stat Analyser

JavaScript, PokeAPI, Gemini API, CSS3

[GitHub-1](#) | [Live Demo-1](#) | [GitHub-2](#) | [Live Demo-2](#)

- Built an interactive, turn-based battle simulator with dynamic HP tracking, type-matchup logic, and real-time attack resolution leveraging the Fetch API with asynchronous programming (async/await) for seamless real-time data retrieval.
- Integrated the RESTful PokeAPI via the Fetch API to asynchronously retrieve live Pokémon statistics and sprite assets.
- Integrated Google's Gemini API to generate AI-powered Pokémon stat comparisons and battle insights.
- Optimized DOM updates for seamless real-time battle-state transitions and custom CSS animations.

Responsive Frontend UI Collection – Porsche & Crav Burger

HTML5, CSS3, Vanilla JS

[GitHub-1](#) | [Live Demo-1](#) | [GitHub-2](#) | [Live Demo-2](#)

- Developed 2 fully responsive landing pages with mobile-first design and smooth CSS animations.
- Implemented immersive micro-animations, video integrations, and modern UI/UX principles to deliver a premium user experience without relying on external CSS frameworks.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ Data Structures & Algorithms problems on LeetCode (1446 Contest Rating).
- HackerRank SQL (Intermediate) Certificate – June 2024.
- freeCodeCamp Responsive Web Design Certificate – April 2026.
